

ARROJO PRODUCT INGREDIENT INFO

For modern creative hairdressing, ARROJO Product uses high-quality formulations. Certain ingredients, however, can cause allergic reactions or be harmful to some. This info-graphic shows which products are free from these ingredients. Wherever one sees a colored dot, it means the product is free from the listed ingredient.

shine spray	●	●	●	●	●	●	●

SULFATE FREE

Sodium Lauryl Sulfate (SLS) cuts grease and makes hair products lather. For some, sulfates can cause skin and scalp irritation. Over-using sulfates can also cause dryness and damage in certain hair types.

PARABEN FREE

Parabens are preservatives that stop bacteria and fungus from growing in beauty products. There are concerns that parabens may cause cancer. Although unsubstantiated, this concern is making paraben-free products more desirable.

WHEAT FREE

Those who are wheat-sensitive should avoid the ingredient. Eczema sufferers find scalps feel better if they avoid wheat.

OAT FREE

People with oat sensitivity should avoid the ingredient. Some people complain of inflamed skin, hives, or eczema if they use products containing oats.

SODIUM CHLORIDE FREE

Sodium Chloride is a natural salt; it is used in hair products to adjust the viscosity. Over usage can strip hair of natural oils leaving it dull and dry.

SILICONE FREE

Silicone coats hair to make it appear smoother, less frizzy and shinier. Water-soluble silicones can be easily washed away but non-soluble silicones can cause build-up and be damaging to hair and scalp.

GLUTEN FREE

Otherwise gluten-free ingredients may contain gluten due to being grown in the vicinity of glutenous plants, like barley or rye. We only list products as 'Gluten-Free' if we are sure of no cross contact. For those with celiac disease and gluten allergies, 'gluten-free' provides peace of mind. Eczema-sufferers usually find skin and scalp less irritated with gluten-free cosmetics.
